LANGUAGES

- Amharic
- English

PROFILE

Full-stack software engineer passionate about building reliable, scalable, and user-focused software solutions. Experienced in developing end-to-end applications with a strong commitment to clean code, continuous learning, and delivering software that creates value for users and businesses.

EDUCATION

Bachelor of Software Engineering

Debre Berhan University

2022 - 2026

CGPA: 3.57 / 4.0

Exit : 78.75/100

PROJECTS

Web Based Project Management System

A comprehensive, enterprise-grade project management system developed for YOD Business Solution, a software company, to streamline internal operations and project delivery.

Technologies Used: React, redux, ASP.NET Core, PostgreSQL, SignalR, Cloudinary, Vercel, Render, Supabase

Intelligent Assistant Chatbot for ERP System

Developed an AI-driven ERP chatbot. Integrating an LLM, Python-based NLP service, semantic memory, and SQL Server to answer HR and business process queries with session-aware multi-turn conversations.

Technologies Used: React, ASP.NET Core, SQL Server, LLM

Attendance Manager App

Developed an Android attendance management app that allows teachers to manage classes, add students, take daily attendance, and view reports with pie charts

Technologies Used: Java (Android), SQLite

E-Commerce Platform

Developed a full-stack e-commerce platform featuring product management, cart, PayPal checkout, order tracking, and an ML-based recommendation system, with role-based admin and client portals.

Technologies Used: ASP.NET Core MVC, SQL Server, PayPal API, Brevo API, ML.NET, Bootstrap, Heroku

Multi-Tenant Delivery Management Platform

A cloud-based, multi-tenant SaaS platform enabling independent businesses to run their own delivery operations on shared infrastructure with full tenant isolation. Includes web and mobile experiences for customers, business owners, and integrated local payments.

Technologies Used: NestJS, TypeScript, Prisma ORM, PostgreSQL, Redis, Next.js, Tailwind CSS, Flutter, Docker, JWT Authentication, RESTful API, Chapa

EXPERIENCE & ACHIEVEMENTS

Full-Stack Developer Intern RedCloud Business Solution

- Contributed to the development of a web application using ASP.NET Core, React.js, and SQL Server.
- Assisted in implementing backend features and integrating frontend components.

Backend Developer (Remote) YOD Business Solution

- Developed backend features for a Product License Management system.
- Built and maintained REST APIs using ASP.NET Core.

Full-Stack Developer (Final Year Project) Developed for YOD Business Solution

- Designed and developed a web-based Project Management System for YOD Business Solution as part of a university final year project.
- Built both frontend and backend features using ASP.NET Core, React.js, and PostgreSQL.
- Collaborated with team members throughout the software development lifecycle, from requirements gathering to deployment.

Maintained a 3.57/4.0 CGPA throughout my university studies.

Scored 78.75/100 on Ethiopia's National Exit Examination for Software Engineering, earning an Outstanding Performance recognition.
